

FORD SERVICE

New F-150 and Super Duty Pickup Box and Super Duty Cab Assemblies Now Available For Select Models!

Let Ford provide you with OEM-quality parts at competitive prices while helping to make your customers 100% satisfied with their truck's collision repair.

Here are 5 ways how:

Reduced Overall Repair Cost

Competitive price and ease of installation combine to help reduce overall repair costs.

Reduced Repair Cycle Time

The assemblies eliminate the need to order and assemble individual components or the prep work often required when a salvage unit is used.

Shorter Delivery Times

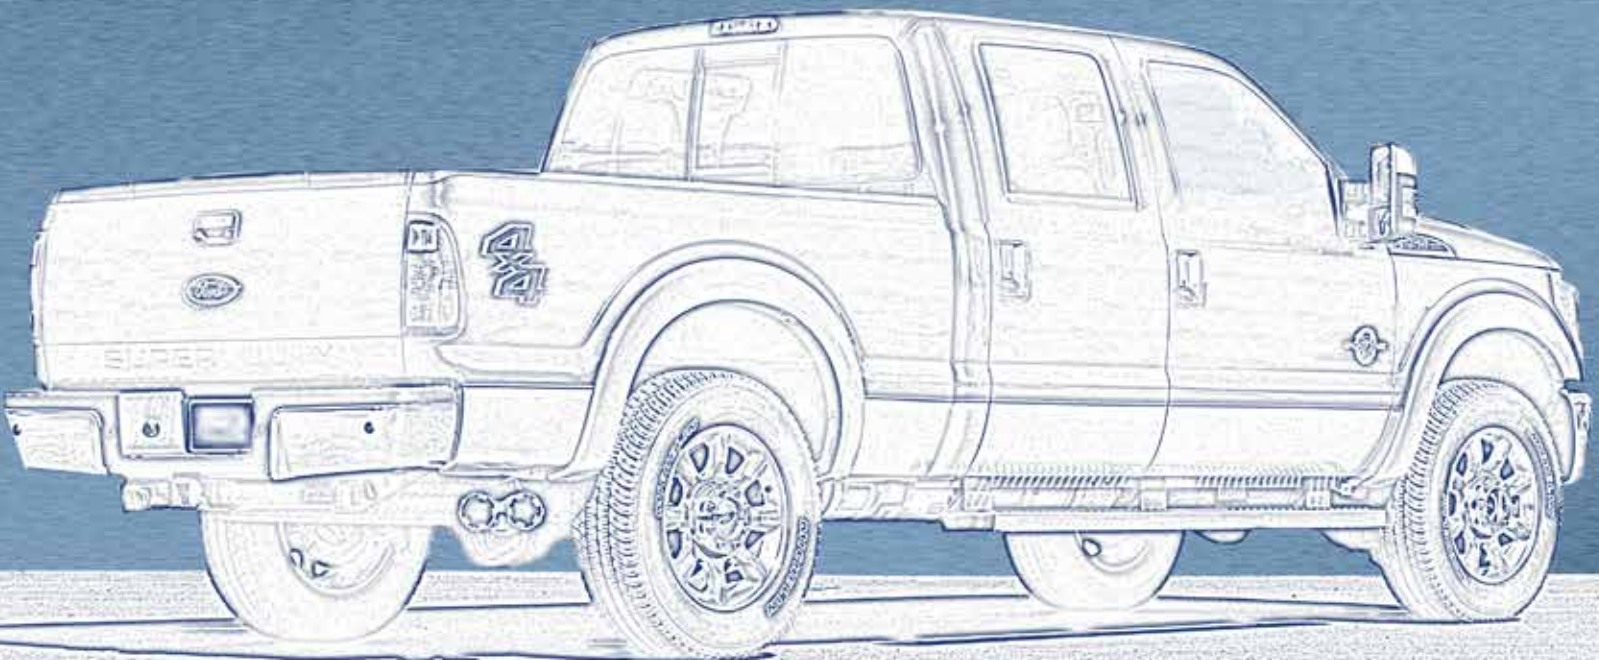

From time of order, delivery is approximately 3 to 6 business days.

Reduced Damage

Superior, custom packaging protects the entire assembly and helps to assure your total satisfaction.

Improved Overall Repair Quality

These new assemblies are the same as those used in new-vehicle production, with equivalent fit, finish, structural integrity, corrosion protection and dent resistance – something that is not consistently delivered with a salvage unit.

PICKUP BOX & CAB OFFERINGS

These original equipment assemblies carry Ford's lifetime sheet metal guarantee, and include the tailgate and primed sheet metal only. **Fenders are not included. Lights, molding, tailgate hardware and other trim items are not included.** ALL F-150 pickup boxes will only have a conventional tailgate. F-150 boxes will not include the Flexgate/Stepgate. This only applies to F-150.

Cab assemblies are shipped with hood, doors, and fenders. When ordering F450/550 cabs, the fenders will need to be ordered separately and installed in place of the F250/350 fenders that ship with the cab assembly. The Ford parts catalog should be referenced for corresponding fender part numbers.

Current Production Availability

All boxes and cabs available on this program are for current production F-150, Ranger or Super Duty vehicles. Long-term availability varies among box or cab type and will be available while supplies last. Once inventories are exhausted, dealerships will continue to have the ability to service in detail. Boxes and cabs are not eligible for return.

Next time you need a replacement box or cab for a Ford truck, choose one of Ford's original equipment assemblies for the best repair possible.
